

**We want to make sure it is actually you
we are dealing with and not a robot.**

Why is this verification required?

Something about the behaviour of the browser has caught our attention.

There are various possible explanations for this:

- you are browsing and clicking at a speed much faster than expected of a human being
- something is preventing Javascript from working on your computer
- there is a robot on the same network (IP 121.126.206.205) as you
